

# Jamal Branch

## South Jersey Gas

Jamal has been involved in Damage Prevention for 10 years. Starting off working with a markout contractor performing 811 requests before eventually coming to SJG joining the Damage Prevention Department. Jamal works with Excavators throughout the territory to make sure they are digging safely and speaks with local municipalities to share the “call 811 before you dig” message.

## Calling 811 & Safe Digging Practices

Discussion about what 811 is and when it needs to be used. Understanding what the NJ laws are when it comes to any excavation being completed in the state. How to safely dig around underground utilities and what to do if a damage occurs.
