

Trevor Reinwald

Milwaukee Tool

Trevor is a Territory Manager JSS Mechanical/Plumbing. He is originally from Northern California where he spent the last 2-years working with Milwaukee Tool on the West Coast. As of recent he accepted a new role on the JSS Mechanical team covering the state of New Jersey. In his free-time he enjoys skiing, watching sports, and spending time with his friends/family.

Press Tools & the Growing Trend

Over the past 15 years, the pipe connection industry has experienced a significant shift toward the use of press fittings. Numerous fitting manufacturers have entered the market, a trend that is expected to continue well into the future.

Milwaukee has made substantial investments in this rapidly growing sector, partnering with some of the world's leading fitting manufacturers, including Viega, Mueller, ZoomLock, RLS, and NIBCO. These strategic partnerships have enabled us to deliver groundbreaking solutions that are transforming the industry.

In this presentation, you'll gain insight into the transition from traditional sweat and solder methods to press technology, understand the key drivers behind this evolution, explore the benefits of press fittings, and discover what the future holds for this innovative approach.
